This—From Italy

The nearest approach to an excuse for rejecting President Roosevelt's request that has occurred to the Nazi or Fascist press comes from LI Popolo D'Italia. It "denies the President has any right to intervene in European questions because his country is not directly interested and because he personally has not the slightest claim to assuming the role of friendly and impartial mediator."

In plain language the proposition thus laid down is that it is none of the business of the United States whether or not Europe is kept in turmoil, that the national trade strangled and blocked, and its peoples successively deprived of the right of self-government and national existence. Waiving other considerations, a creditor, it appears, is not entitled to even ask whether his debtors are to be compelled to squander their substance in preparing for war instead of paying their debts. Coming semi-officially from the ally of the chief delinquent, this suggestion makes up in impudence what it lacks in moral decency.

But the Italian memory is as bad as the Italian logic. It seems to be forgotten at Rome that if the country of President Roosevelt had not intervened in European questions twenty odd years ago—questions in which it was not "directly interested"—Signor Mussolini and his associates and countermeasures in fair preparation of learning the goose-step under German or Austrian or Bulgarian or Turkish drill sergeants. Gratitude might at least prompt a civil reply to a civil question from the head of a country that helped to save Italy when it couldn't save itself.

A Job for Everybody

As it did last year, the Junior Chamber of Commerce is launching a spring cleaning and beautification campaign. The object of course is to give the city an attractive appearance as possible. This year there is the unique incentive that a few weeks hence Edmonton will have to pass inspection by Her Majesty, and by thousands of outsiders who will come to help welcome them. It is desirable surely that the city shall look its best on that occasion.

That a good deal of spring cleaning-up is urgently required no one needs to be told. That is inevitable after five months of winter. Raking and burning rubbish, disposing of the winter's accumulation of tin cans, and other spring chores of the recurrent type can accomplish marvels in the way of neatness. As to repaving and improving, and applying a coat of paint here and there, the opportunities for improvement are unlimited. And if the beautification idea, there is also flower beds to be made, trees to be trimmed, and numberless other ways in which the impression created by the appearance of the city can be greatly bettered.

The civic authorities are backing the campaign, but if it is to be really successful the citizens generally will have to lend their interest and each carry out whatever improvements may be required to give as pleasing an effect as possible to their surroundings and all private premises. That they will do this is to be hoped, and may surely be expected. The campaign is under way now, the weather is favorable, time is passing, and action is what the situation calls for.

Hungary Also Wants Territory

Hungary has formally affixed itself to the Berlin-Rome axis, "spontaneously" according to Premier Teresio. There is no reason to doubt the spontaneity, as there never was doubt to doubt which way its sympathies and ambitions pulled. Hungarians want Transylvania, which it lost to Rumania in the war. It also wants a part of Yugoslavia. Since it profited by Hitler's ramp to the extent of grabbing the province of Czechoslovakia, it no doubt hopes to gain these other objectives by help of the dictators or with their consent. Prospect of securing the coveted territory through their manipulation there was none. Hungary's adherence to the axis thus represents no loss or prospective loss to the anti-aggression forces, for there never was the slightest chance that it would line up with Rumania—and invite the fate of Warsaw, but be driven away by the bad cooking of their wares. The League investigated seventy-two cases.

the axis powers and Poland, the new partner in the alliance of threat is being used to soften Polish resistance to what ever the Fuehrer wants on his north-eastern front; Hungary and Poland being on friendly terms and partners in the plunder of the Czech state. Probably what the Fuehrer wants is Danzig. If so he likely will get it. Danzig does not belong to Poland. It was established as a free city under protection of the League of Nations. The Poles built a rival port at Gdansk, and the League has been evidently foreseeing that some day the free city would be absorbed in East Prussia.

So long as the Fuehrer does not try to pry off a slice of Polish territory in the corridor of Silesia, the Poles are not likely to fight over Danzig, and unless they elect to fight their reciprocal pacts with Britain and France will have no bearing on the case. The annexation of that city would be an important gain to Germany, and another step toward the League, but it would neither weaken or involve the anti-aggression group.

Editorial Notes

One member of parliament thinks the Prime Minister should not accompany the King and Queen on their tour across Canada, because there may be a general election this year. Quite likely if the Prime Minister had planned otherwise, the same or some other member would be accusing him of lacking loyalty, or hospitality, or another did not faced most of whom will, of course, be guiltless of any criminal act or intent.

The Provincial Government is to appoint a board of five men to conduct research work into the causes and cure of cancer. There will be unqualified approval of this in every quarter. It is to be supposed those chosen will be the best obtainable for the work. If so, the object will justify a generous expenditure of public money in this province as elsewhere the disease is leaving a terrible toll of suffering and death.

The burning of a French liner at Le Havre may have been due to an accident. But the circumstances, and the simultaneous outbreak of fire in several parts of the ship, make the incident look like the work of saboteurs. The French police seem to have positive suspicion that it was the doing of foreign agents. If their investigation supports that view, the criminals will have done unintended hardship to large numbers of people in many parts of the world. For if the Paris was destroyed deliberately by alien political agents, suspicion against foreign residents in other countries will be focused most of whom will, of course, be guiltless of any criminal act or intent.

Fifty Years Ago

From the Files of The Edmonton Bulletin

Jellet and Ottewill have sowed about fifty acres of wheat and put in 200 acres of grain of other crops.

Jas. Mowat, John Fraser Jr., and John Carson of Battle River, are here with freight. W. Connors left for the Landing to take a position as engineer on the Hudson's Bay steamer, Athabasca.

Forty Years Ago

J. G. Oliver came in from the Landing yesterday.

J. G. Fairbanks is going extensively into the raising of pure bred poultry.

E. Lee, formerly of Edmonton, writes from Dawson.

The Hudson's Bay Co. contemplates moving their store and office from Edmonton to the Landing.

Thirty Years Ago

Toronto: Hon. S. H. Blake, K.C., an ardent churchman, has brought his pen into action and started an attack on the "night" criticism.

The proposed asylum of Panoska will be erected during the coming summer, the foundation work having been started last fall.

Ottawa: It is estimated that 200,000 immigrants may come to Canada this year.

Twenty Years Ago

Limerick: Major Wood's airplane fell in the Irish sea while he was enroute from England to Ireland.

At the annual meeting of the Teachers' Alliance in Calgary, steps were taken towards the adoption of a provincial wage scale.

The executive committee of the Trades and Labor Council declared waste the seats of all delegates active in promoting the project of one union.

Ten Years Ago

Geneva: The preparatory commission rejected the Soviet disarmament proposals. It is rumored that Soviet representatives will leave the conference.

Current Comment

Just Eudemonists

Will Hays, whose job is to keep the movie pure, knows all the big words. He keeps them all. In his annual report on the industry, he launched one that should receive attention. The popularity of "Sinner White and Seven Dwarfs" in a world devoted to Jesus and a schism, says Mr. Hays, deduced that "there are still a number of eudemonists left in the world."

Our trusty dictionary informs us that eudemonists are people who think it is worth while to work for happiness as a thing in itself. So movies which help to give people a few moments of happiness are still popular, even if they do not get down to grips with heavy social problems.

There are all many people who go to the movies simply to be amused. But probably not one in a hundred suspected that he was just an old eudemonist.—Victoria Times.

When the King Comes

A well-known Government official, identified in the news columns as "spokesman for the Royal Visit," made this statement the other day:

"There's no reason in telling people they'll have to buy a complete new outfit of clothing because they will be presented for ten minutes in the presence of His Majesty. We issuing no instructions whatever on the matter of dress. People can wear whatever they like on any occasion."

That is a sensible decision, we think, and one which will commend itself to the great majority of Canadians. The warmth of the reception for His Majesty and the Queen will be measured by the clothes we wear on their public appearance or even on more formal occasions. It is the spirit that counts, and a loyal heart is as likely to beat beneath a worn coat as beneath the most correct of morning coats.

The King and Queen will see us as we are, not as we are supposed to be in an ideal picture. We do not need to put on airs for the head of the British Family. If we are natural and sincere, and if we are friendly and warm, we will make a good impression on the royal couple.

Metal Exports to Germany

From a report by the Canadian Trade Commissioner at Berlin, published in the Commercial Intelligence Review.

Germany is an importer of a large and varied number of ores, minerals and metals. In most cases there is a complete lack of these within the country itself, and the needs of industry are substantial. Among the supplying countries Canada occupies a most important place and, collectively, ores, minerals and metals account for a large proportion of the total exports from Canada to Germany.

Among the individual commodities under the classification of ores and minerals, asbestos is one of the most important. During the last year the total value of Canadian metal exports from all sources was 13,368 metric tons—an increase from 12,024 tons the year previous. As regards last year's figures, 19,554 tons were shipped to Germany, an increase of 1,480 tons.

It will thus be seen that Canada supplied 69 per cent of Germany's total requirements of metals and 63.3 per cent by value. Imports from Canada have increased from their 1927 level, when the weight was 15,198 tons.

Imports of lead ore totalled 141,288 tons. Canada was credited with 28 tons. Yugoslavia was the principal source of supply, with Newfoundland in second place. Canada was shown as the country of origin for 95 tons of gold ore. Total imports of nickel ore weighed 34,315 tons. Canada supplied 13,368 tons. Additional imports were credited to Burma and Netherlands India. The statistics also credit Canada with 12 tons of iron dross and seven tons of waste lead and zinc slag and waste.

Among the products of metallic origin imported from Canada in 1938, there were also 810 tons of ferro silicon, a comparison of 1938 and 1937. Imports of ferro silicon in 1938 totalled 18,105 tons. Norway was by a wide margin the leading country of supply. Canada was credited with 32 tons of barium, lead, sodium, and nickel alloys. Imports of carbon black from Canada in 1938 totalled 1,084 tons. Canada supplied 11,225 tons and Canada 355 tons.

In 1938 Canada was credited with 566 tons of ferro silicon, a comparison of 1938 and 1937. Imports of ferro silicon in 1938 totalled 18,105 tons. Norway was by a wide margin the leading country of supply. Canada was credited with 32 tons of barium, lead, sodium, and nickel alloys. Imports of carbon black from Canada in 1938 totalled 1,084 tons. Canada supplied 11,225 tons and Canada 355 tons.

In comparison with preceding years, the quantity of aluminium imported into Germany from Canada was of importance and assisted considerably in the heavy increase of 1938 imports against those of 1937. During 1938 the total value of raw lead imported into the country weighed 14,320 tons. The respective figures for the year before were 3,644 tons. The total value of raw lead imported into the country weighed 14,320 tons. The respective figures for the year before were 3,644 tons.

Lead imports from the Canadian declined in 1938 in comparison with the year before. The total value of raw lead imported into the country weighed 14,320 tons. The respective figures for the year before were 3,644 tons. The total value of raw lead imported into the country weighed 14,320 tons. The respective figures for the year before were 3,644 tons.

The German trade statistics classify zinc only under several headings, but only in one of them the name of the Belgian country is given for fine zinc, which is almost chemically pure. The total volume of this zinc entering the country in the last year was 18,105 tons. Norway supplied 13,197 tons and Canada 826 tons.

The total imports of refined nickel in the raw state went up to 1,282 tons in 1937 to 2,684 tons in 1938. In the last-named period the United Kingdom was credited with 1,272 tons, Norway with 923 tons, and the United States 946 tons, and Canada with 612 tons. In 1937 imports from Canada weighed 133 tons.

New refined copper is an important article in German-Canadian trade. The total value of refined copper imported into Germany from Canada in 1938 was 169,919 metric tons in 1937 to 272,400 tons in 1938. Rhodesia, the United States, Chile and the Belgian Congo ranked Canada as countries of origin. Canada supplied 18,994 tons as compared with 6,414 tons the year before.

In addition to raw copper Germany imported copper scrap and alloy to the total weight of 27,207 tons. The United States supplied close

The Passing Show

By J. S. COVVER

Lucky that pressure was brought on Prime Minister Chamberlain to enter into a pact with Soviet Russia, for a united stand against the aggressive nations. Had the members of the House called out "What about Russia?" when Chamberlain told of his pacts with Rumania and Greece, he would have been as reasonably intended to make no mention of this largest and most powerful democracy in the world.

No wonder that Russia demanded a clear contract from Britain and France. The Russians have ground for suspicion. They saw these two powerful nations hand Spain over to the enemy and starve democracy into surrender for fear lest a government victory would aid democracy in Europe. The pact that Russia sided the Spanish government doesn't help the case. It was the duty of the Russian government to put munitions to this sister government and the Russian people in a position to defend themselves against a Fascist invasion. Having in mind the way in which the Chamberlain government helped betray democracy in Spain and how France betrayed the Czechs in their hour of need, Russia has cause to demand a clear agreement.

I know that Chamberlain's defenders urge that he could do no other than agree to the Pact of Munich, because Britain was not prepared for defense. It there is truth to that contention, but that doesn't absolve British statesmen. A country so wealthy as Britain, and so powerful by aggressive dictators breathing open threats, and active in aggression in Spain, ought never to have been so stupid as to sign a pact that is not a bloodthirsty trap, but I could see more to the scaffold for allowing the national defense to be placed in the state of weakness. There was no excuse for it. It's a form of treason. Every body seems to have lost his afternoon cup of tea over it.

I'm in no position to speak for Russia, beyond the ordinary reactions of human nature. The only Englishman I know of, who is in that position by intimate knowledge of the nation and its rulers is Walter Murray. Since the day of the revolution he has been in Russia. He is now an expert in Moscow. Here is a would prefer an extract from a recent LIFE OF PEACE written by him in the New York Times.

"The U.S.S.R. is utterly against aggression because it believes aggression sooner or later must mean the destruction of the world. It is not even other folk's war, because it fears it might be dragged in."

"Secondly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Thirdly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Fourthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Fifthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Sixthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Seventhly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Eighthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Ninthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Tenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Eleventhly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Twelfthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Thirteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Fourteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Fifteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Sixteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Seventeenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Eighteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Nineteenthly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Twentiethly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Twenty-firstly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. They do not like the German Government, and they do not, I venture to suggest, think the British Government is sane. Neither do they follow themselves in admiration of the Polish Government and the ingenious Colonel Joseph Beck, its foreign minister. But being realistic-minded, they believe Russia's policy is to play even other folk's war, because it fears it might be dragged in."

"Twenty-secondly, the U.S.S.R. would like to play with Britain, despite its distrust—or possibly dividing skepticism—of Prime Minister Neville Chamberlain. This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some faint smudges and discoloration, characteristic of old paper. The left edge of the page shows the binding of the book.

Countries Threatened By Germany May Turn Deaf Ear To Roosevelt

OTTAWA, April 21—Dominion government departments will be closed May 20, the date on which Canadians will celebrate the birthday of King George.

Closing of government departments on May 24, Victoria Day, will depend on whether parliament is sitting. If it is, a skeleton staff will remain on duty, if it is not a general civil service holiday will be observed.

The birthday of King George has been observed in Canada on June 3 since his accession to the throne but this year it was moved ahead to May 20 so it could be celebrated while Their Majesties were in Ottawa.

The King's actual birthday is

December 14.

**DISPUTE OVER
12 LONG-MANED
ARMY HORSES**

OTTAWA, April 21—Twelve long-maned horses were centre of a dispute last night between the Royal Canadian Mounted Police and the Princess Louise

The animals are among 40 horses the dragoons are training for a travelling escort here during the visit of the King and Queen. The remaining 28 horses have clipped manes.

Dragoon officers would like to clip the manes of the R.C.M.P. mounts but police officials do not agree. The P.L.D.G. find it impossible to grow long manes on

**Englis Firm To
Get 11.22 Per Cent.
Of Annual Yield**

OTTAWA, April 21—The British and Canadian Bren gun contracts will give the John Inglis Co. a total annual net yield of 11.22 per cent. The capital actually invested by the contractor, the commons public accounts committee was told Thursday by C. Fraser Elliott, Dominion come tax commissioner.

Mr. Elliott, a member of the inter-departmental committee which approved the Canadian contract, calculated the \$450,000 total profit on

The agency said the German demand was served upon the foreign ministers of the various countries through the German envoy in each capital. It added that since the minor states would find it difficult to answer in the affirmative, Chancellor Hitler would be able in his reply to Mr. Roosevelt to argue, on the basis of the negative responses, that the countries for whom the President sought a German pledge of non-aggression did not regard themselves as menaced by the Reich.

CITY LIKELY BUILD HOMES FOR CITIZENS

Committee Recommends Five Dwellings Be Built At \$3,600 Each

City bylaws committee decided Thursday to recommend that the city build five houses at an average cost of \$3,600 each this summer, to be sold to citizens.

The plan, which committee had earlier recommended, is to build five houses at a cost of \$3,600 each, to be sold to citizens at a profit of \$2,000 each. The houses would be built on the city's own land, and would be sold to citizens at a profit of \$2,000 each.

The federal government has granted the city \$50,000 for the purpose of building houses for citizens. The city has also received a grant of \$50,000 from the federal government for the purpose of building houses for citizens.

The plan is to build five houses at a cost of \$3,600 each, to be sold to citizens at a profit of \$2,000 each. The houses would be built on the city's own land, and would be sold to citizens at a profit of \$2,000 each.

The plan is to build five houses at a cost of \$3,600 each, to be sold to citizens at a profit of \$2,000 each. The houses would be built on the city's own land, and would be sold to citizens at a profit of \$2,000 each.

CONSERVATIVE PARTY PLANS NOMINATIONS

Candidates Will Be Placed In Three Ridings in May Conventions

Three nominating conventions to place Conservative candidates in the federal election in the Edmonton West, Edmonton East and West-Edmonton ridings will be held during the week commencing May 21. It was disclosed at a meeting of the Edmonton West Conservative Association Thursday night at which it was decided to hold an open convention to nominate a party candidate. Probable date of the convention will be Monday, May 22.

Other conventions to be held about this time will be in the West-Edmonton and East-Edmonton ridings, and it is expected that M. A. Macpherson, K.C., Regina, runner-up to Dr. Manion at the Ottawa convention, will be the principal speaker at the three conventions.

The Inquiring Reporter

A judge in the United States recently suggested a heavy tax for bachelors to increase the rate of marriage. "Would you be willing to pay a tax in order to preserve your bachelorhood?" asked The Bulletin's Inquiring Reporter.

Below are replies:

GEORGE HARRIS, insurance man: Preservation is one of the first laws of nature. Don't ask me any more questions. I have an appointment.

JOHN TARBON, engineering student: It all depends. I really don't want to jump into matrimony just to avoid the tax, but I might look into it a little later for the right girl.

REUBEN MAGEE, salesman: I'd pay the tax. I enjoy my freedom and it's worth a pretty fair price. In fact, if the mill rate on bachelors became too high, I'd lead a revolution but I wouldn't be pushed into the matrimonial mill.

KEN MITCHELL, railroadier: I never intend to pay a bachelor tax. I'd draw your own conclusions.

HENRY WHITE, secretary: I really don't know. You needn't try to get me to say anything.

E.D. CARSON, stenographer: I'm not a confirmed bachelor yet. I'd get married before paying a sleep tax, but that wouldn't be a hardship. Did you ever notice the girls in Edmonton?

No Accidents

Not one motor accident was reported to city police between 6 p.m. Tuesday and 9 a.m. Friday.

Police said Friday. Rapid check-up by police recently on mechanical condition of city driven autos is believed partly responsible for the clean slate.

THE HUMAN EYE

By Jackson Bros. Optometrists

Who can estimate the value of good eyes. If one were offered the riches of the world in exchange for his powers of vision, the proposition would be rejected.

Of all the organs of special sense possessed by man the eye is by far the most important. Life certainly loses much if not all if the eyes are lost. Yet in every walk of life the eye is called upon to perform perhaps more than any other organ of the body.

Weak eyes, like weak arms, can be developed and strengthened and the eyes may be very much abused and strained, causing untold suffering for years, and then, after proper treatment be relieved to a very high degree of usefulness.

While eyestrain may, and often does, produce symptoms directly referable to the eye, such as pain in and around the eye, tearing, inflammation of the eye, it is indeed a noteworthy fact that in

many cases the patient complains of no or not all of ocular symptoms. In cases of the greatest eye strain the patient will hardly ever feel the eyes themselves are perfect and give no trouble.

Thousands all about us today are suffering, directly or indirectly, because of untended eyes.

To make sure that you are not suffering from eyestrain, call in for our expert eye examination which is open every day, Sunday and Holiday days, and have our registered Optometrist give your eyes a thorough exacting examination. He will tell you the true condition of your eyes.

If you need glasses you can have the life of them while paying for them by using our well established cash pay plan in weekly or monthly payments.

For your appointment, call, write or phone 21747.

Sudetens On Way to New Homeland

Seek New Life On Peace River Farms

Nearly 100 Sudeten refugees passed through Edmonton Thursday afternoon, bound for the Peace River farms. Pictured at the top above is a typical group of the men who will make up the new colony. Centre left are shown two of the children in the party. Centre right is a mother holding her chubby little son who doesn't know what the fuss is all about.

In the lower left, two of the older girls show that a woman is always a woman, as one curls the other's hair. Lower right is the man who was selected as spokesman for the group. He wears a strong resemblance to Hitler, whom the party is fleeing.

They left over the Northern Alberta Railway Thursday morning for the Peace River where they will start a new life, in a new country, speaking a new language, making their livelihood at a new occupation.

There were 87 colonists in the party. They were the three main branches of one meeting.

Sudeten Families Seek New Life On Peace River Farms

Twenty-five families of Sudeten Germans, political refugees who fled from the Sudeten area of Czechoslovakia when Hitler took possession of the territory last September, passed through Edmonton Thursday afternoon, bound for the Peace River colony.

Traveling in two Canadian Pacific Railway colonist cars, they stopped for two hours in the city and slipped onto the platform to board meeting Thursday.

A special meeting to salute and bid the refugees will be held at the city hall on Friday. Field of those seeking the post will be narrowed down to four or five, whose applications will then be considered in detail.

An increase in the number of borrowers and the number of loans during the month of March, compared with the same month last year, was shown by the report of Miss Grace Dobson, acting loan officer.

A total of 9,078 books were loaned in March, an increase of 1,585 over the same period last year. A total of 386 new borrowers were registered during the month. There have been 1,896 new members registered to date in 1939.

ANGELICANS IN CELEBRATION OF PROGRESS

Banquet Marks Silver Jubilee Of Church—Dignitaries Speak

Notes of reminiscence were struck deeply Thursday evening as clergy and laymen festsallied in the Cornelia hotel to recall the progress of the Anglican diocese of Canada through the English in this province, 25 years since its conversion.

The silver jubilee was marked by a banquet attended by over 200 members of the church.

Outstanding education, eloquence and a superabundance of piety are not the main assets of a diocese for a superior ministry in the real spirit of the church," His Honor Judge A. V. O. Bury of the district court said in proposing the major toast of the evening to the diocese.

"Rather, the main essential is the winning touch of a clean wholesome personality."

TRIBUTE PAID

High tribute was paid by Judge Bury to Rev. W. H. Dwyer who was killed overseas while carrying out his duty in the front of the trenches during the war, and to the clergy and laity who have followed in his footsteps.

"These two men along with Rev. Arthur Murphy and the late Dr. McQueen are honored above all for their dignity and character," His Honor declared.

Judge Bury who first attended Christ church in 1912 was the first chancellor to the first bishop of the Edmonton diocese, and a member of the executive committee.

Reverend to the diocese toast was given by Mr. Rev. A. E. Burt, D.D., Lord Bishop of Edmonton, who thanked the organizations of the church for their support in the past years which has made the progress of the diocese possible.

"We have gone steadily forward since creation," His Lordship said, "and I plead with you to carry on the work. There is need for greater effort at self support. The churches have fallen down in their payments of the appointments and consequently our appropriation is just one-half of what was promised."

"There is a great deal of ground

Appeals

GAME BIRDS ON INCREASE, SAYS PROF. W. ROWAN

"Game birds in Alberta are on the increase," Dr. William Rowan, professor of zoology at the University of Alberta, said at a meeting of the Edmonton United Church men's club Thursday evening.

The birds increase and decrease through the year, cycle he explained and the cycle is on the upward bend with its peak to be reached in 1942 and 1943.

There will be plenty of game here this autumn, Dr. Rowan continued, but if true bird-lovers wish to preserve the province's game they must do away with cats. It is not the sportsman who decimates the birds, for if they are shot out of one district they come in from adjoining ones.

Dr. Rowan spoke briefly of his own work which has been termed a "science of migration" wherein he works on the theory that migration of birds is caused by the action of light and has proven that

just to cover as this is still a migratory diocese and there are people who have to be reached by the gospel.

JUBILEE FUND

"My plan is this: As a jubilee fund, we are establishing a silver jubilee fund to provide at least \$1,200 and possibly \$1,500 to put a priest out among the people of our diocese who are ignorant of the work of the church."

"I wish also to remind you of the league of prayer and service. I have issued a prayer which will be explained to you by your minister on Sunday and this prayer is largely for peace and God can maintain that peace that we need so badly," the bishop declared.

Toasting not only the clergy of 1912 but those who have followed, the diocese of Edmonton, Col. F. C. Jamieson, R.C., spoke of Canon Newton who established the mission of All Saints in 1876, as one of the men whose names should go down in the annals of the history of the Anglican church.

"We honor the men of the past 25 years as our spiritual leaders, for it is they we think of this evening," he said.

DEBT OF GRATITUDE

Recalling St. Thomas' Day, December 21, in 1913, when he was ordained as the first priest of the Edmonton diocese, Rev. Canon W. Leveridge responded to the foregoing toast saying that the diocese owes a debt of gratitude that it can never repay to the early clergymen of the district.

Toast to the laity was proposed by Rev. W. E. Edmonds, who

Chairman

CLIFFORD GAINER

who was elected chairman of the Alberta branch of the Canadian Manufacturers' Association for the 1939-40 term at the annual meeting held at Calgary this week.

By means of affidavits he has so affected the necessary changes in the plan and execution which the bill proposes that it has shown its desire to leave its immediate surroundings.

"In any walk in life you can't expect to hold the same position as the man who has all the talents and when we are so ready to criticize our minister let us remember that the Church of England embraces so many people with different

views and tolerance and learn more about the church laws and government which we may carry on the tradition of the church that does all things decently and in order," he said.

"It is a shocking thing that we pay our clergy such inadequate salaries and I don't know how they live," the judge declared. "I don't know the answer to the problem but we should certainly think about it."

In a brilliantly humorous and witty speech, Rev. P. J. Dwyer, D.A., of the diocese, toasted the ladies. The tribute was responded to by Mrs. W. B. Chamberlain.

Seated at the head table were: Rt. Rev. A. E. Burt, His Honor Judge A. V. O. Bury, Col. F. C. Jamieson, K.C., His Honor Mr. Justice Frank MacKay, P. J. Dwyer, Rev. W. E. Edmonds, Rev. Canon W. Leveridge and Mr. Chamberlain.

Toast to the King was toasted by Bishop Burt.

Tobacco Firm

SAYS PENALTY TOO DRASTIC

Evidence submitted at the alleged tobacco combine preliminary hearing Thursday disclosed that when the National Fruit Company had been out from the tobacco industry on a charge of being a tobacco association's recommendation from a representative of the Imperial Tobacco Sales Company of Canada Ltd. that this penalty was too drastic in relation to the facts and circumstances of the case.

The National Fruit Company was cut from the tobacco list for alleged failure to maintain the standard price and orderly marketing service.

Other witnesses examined on Thursday afternoon was L. E. Laidlaw, manager, and director, Merco Wholesale Ltd., who was questioned relative to correspondence with the Imperial Tobacco Sales Company of Canada Ltd. relative to being placed on the tobacco list.

Correspondence from Hon. E. C. Manning, Alberta minister of trade and industry, in 1937, which favored the principle of price maintenance was read to the record of the court Wednesday during examination of a witness concerning the sale of goods Act of 1938 declaring fixed prices to be legal in the province. This legislation was afterwards repealed.

Students Run a Movie Show

A popular and profitable movie show is being operated by students of the Washington State College.

Members of the Edmonton Boys' Pipe Band will hold their annual piping and drumming competition Saturday at 7:45 p.m. in the Odd-fellows hall, 101 street. The young pipes and drummers will compete for the Kluge trophy, following which a dance will be held, starting at 10 p.m. Judges will be Harry Lunnon, Alex Symonds and Tom Clark.

Children Affected by Cause Impediments In Speech

It gave the case history of a "laryngeal" case who heard on the radio during the September, 1938, crisis that children might have to be evacuated into country districts.

In his annual report Dr. G. E. St. Clair Stokell, L.D.S., chief medical officer, declared: "It is appalling to realize the facts and circumstances of the case and the need for a period of severe slammering."

Mercury Touches 68 Above As New Record Reached

Reckoning to a new high for the Edmonton weather gauge, the thermometer was touched early Thursday afternoon, unaccompanied in the sudden warmth.

Stomped down the stairs for cooling drinks and shed sweat clothing with shocked astonishment.

Deeply quickly during the opening early hours of Friday, the red column fell 27 degrees to an overnight low of 31 then rose to 40 above at 9 a.m., indicating that the forecast of fair and mild would be carried out faithfully by the weatherman.

Smoke stacks, reported to be caused by gas fire and burning rubbish, hung close to the ground Thursday morning.

Weather in the near north cooled slightly, temperatures ranging from 22 to 46 above while in the far north the mercury bobbed between 36 and 48 above.

There are approximately 40,000, 300 drivers on United States highways today, operating 26,000,000 vehicles.

The Handkerchief's History

The pocket handkerchief was first known as "kerchief"—center-kerchief—for the hand, then it became "handkerchief," a covering for the head carried in the hand, and at last pocket handkerchief, covering for the head held in the hand and kept in the pocket.

League's Oratory Competition Friday

The Army and Navy Shield will be awarded to the community league taking the largest number of points in the annual junior and senior public speaking contests of the Federation of Community Leagues to be held in the McKay avenue school Friday starting at 8 p.m.

Two gold medals, presented by the Edmonton branch of the Canadian Legion, are to be awarded, one to the junior winner and the second to the senior winner.

Grass Fires

From 11 a.m. Monday to noon Thursday, 17 grass and bush fires have kept the Edmonton fire department busy. Some have been started by mischievous boys, others by careless gardeners, and others by careless smokers. The all-time record for grass fires in the city is 22 during one day.

Smoke stacks, reported to be caused by gas fire and burning rubbish, hung close to the ground Thursday morning.

Weather in the near north cooled slightly, temperatures ranging from 22 to 46 above while in the far north the mercury bobbed between 36 and 48 above.

CONSTRUCTION OF BLEACHERS STARTS FRIDAY

Construction of bleachers to seat 20,000 people for the forthcoming Royal Visit will begin Friday, according to an official of the British and White Construction Co., Ltd.

First of the stands will be erected on Portage avenue. The firm has a contract, awarded March 30, for construction of 20,000 feet of bleachers, while Muttart from 101 street to 113 street on both sides of the avenue.

The bleachers, which will cost just under \$100,000, are to be completed by May 27.

Blowers are to be erected on Portage, on 101 street near the "Theaterland" station, on 101 street near the C.N.R. station in Jasper avenue, on 101 street opposite the Administration building on the west side of 112 street from the University hospital to the Normal school, and on both sides of Jasper avenue west of the business district.

Blowers are to be allowed 20,000 seats, while the rest are to be sold to the public at one dollar per seat.

Terry Pin's Tips On

Columbus was the first and the last man to land in the West Indies. All the rest have been women on cruises. Just because you can swim well, don't expect to go in a dive in Havana, and come out right side up.

In the West Indies, native boys drive deep for coppers. Since 1928, the same thing has been going on in Wall Street.

You'll do almost as well with a "planter's punch" under a sun lamp. No sea sickness, either.

Home Service

To Win Attention
Speak Well in Public

Know How to Address Audiences
Jen's a leader in club activities since she learned to put her ideas across in meetings. Before studying public speaking she was afraid to say a word.

Now no waiting tentatively for a chance to express herself. It's correct form, she knows, to raise her hand straight to enter the chairman's eye. When he speaks her name she rises, says, "Mr. Chairman, I should like to make the suggestion that..."

Knowing such rules gives poise—and by studying the art of public speaking you can be effective in longer speeches, too.

Be a leader in your group, learn to put your ideas across. Our 32-page booklet tells how to prepare speeches, develop your voice, have poise before an audience. Give correct ways to address a gathering, parliamentary rules, advice to toastmasters and radio speakers.

Send 15c in coin for your copy of Public Speaking Self Taught to The Education Bulletin, Home Service, Edmonton, Alberta. Be sure to write plainly your name, address, and the name of booklet.

Curious World —By William Ferguson

Answer: Upper. They are elongated and specialized upper incisor teeth, growing downward from a point in front of the eye-sockets.

group, from babes in arms to men and women passing middle life, but none aged. All had the strength and the determination to find a new and happier life in a new land.

"Even if Hitler should go, we would not return to Europe," one of them said. "In Europe we are people living in a free land, and we are Canada for the future."

Members of the party had spent several months in refugee camps in England and a number had acquired a working knowledge of the English language. A few spoke it well.

A few who were named spokesmen were interviewed by reporters, while the others listened and interpreted bits of information from the interpreters.

FILE SUDETENLAND

All of them had fled Sudetenland during and immediately following the Munich conference, and all the men were officers or executives of the Labor party, which was opposed to the Nazis. They were executives of the Social Democratic party, the Labor party, the German trade union or co-operative societies.

When the German Reich was granted the right to invade Sudetenland, these people, who knew that they must flee or be placed in concentration camps, fled. In some cases minutes, before the storm troops were knocking at the doors of their homes or places of business.

"I had just left three minutes before they arrived at my office," one man said. He did not with his name mentioned, he had left his wife and friends in Germany. "In some cases people were caught by a night, in some cases by an hour."

ROME TURN NAZI

"Those people who were not just arrested as far as we know, as the Nazis felt it was of little use to put any but the leaders in concentration camps," he said. Another man said that most of those who were arrested in the Nazi Reich, feeling that they were the only safe country.

Refugees fled across the frontier into Czechoslovakia, the party that remained in Sudetenland until Hitler's invasion there moved to Prague. From there they moved to England, some to Scandinavian countries and Finland.

REFUGEE CAMPS

They spent several months in refugee camps until arrangements were made by the British and French governments to supply them with funds. Some had managed to save some of their own holdings.

Finally the British and Canadian refugee committees arranged for their settlement in western Canada, a group in Saskatchewan and this group in northern British Columbia. They were given \$1,500 for each family. Homes are now under construction in each area.

\$800,000 FOR JASPER PARK IS ADVOCATED

Continued from Page Eleven

Lancaster, John Blinn, W. H. Stauf, George A. Keith.

The statement was read Friday, pursuant to the meeting, the chamber of commerce said it hoped the suggestion of \$800,000 for the park, brought before the House of Commons, would be adopted.

The committee request for the Jasper park site total approximately \$800,000, the statement declared.

NEW BUILDING

"These requests consist, first of an emergency program to be completed this year, including construction of a new public building to house the courts, and also, as well as federal government departments serving the park, recreation and establishment of an information bureau; establishment of a new camp grounds for tourists; equipping the town with new fire fighting apparatus; installation of a fire alarm system; improvement to the sewerage system; establishment of a fish hatchery; reclamation of the Jasper-Banff highway, etc.

SECOND PROGRAM

The second program commenced this year and to be completed in 1940—construction and hard work of 32 miles of the Jasper highway within the park; replacement of the old road; construction of a fire alarm system; improvement to the sewerage system; establishment of a fish hatchery; reclamation of the Jasper-Banff highway, etc.

TCA Passenger Service Now Proving Popular Official States Here

Although passenger service in Trans-Canada's "liner" planes has been available for less than one month it has already proved popular, not only among Edmontonians but also among passengers in other parts of Canada, according to W. A. McLeod, local passenger representative.

The average number of passengers carried on each flight is reported at and leaving the Edmonton airport is high. Mr. McLeod told the Bulletin. On two occasions eight passengers have left the city on the same trip.

GERMAN FLEET PASSES THROUGH ENGLISH CHANNEL

LONDON, April 21.—Sworded for the most part by darkness and mist, the German fleet en route to manœuvre off the coast of Atlantic coast passed through the English Channel last night and today.

The last sight of the German fleet was a destroyer bearing the number 33 on her hull. She passed Dover, heading south, at 5:15 a.m. Greenwich mean time (10:15 p.m. M.S.T.). Two battleships came into view there last night.

The German battleship Admiral Scheer was seen passing St. Catherine's Point late of Wight, last night while two destroyers and two destroyers were sighted off Beachy Head, 55 miles southwest of Dover.

The naval message was believed to number between 20 and 40 vessels.

VARSAITY LAD EATS 17 EGGS WHILE DINING

Eastern United States colleges may have their gold fish, magazine sales and girls that are able to kiss a boy a minute, but the University of Alberta has a student who ate 17 eggs to start a terrific boom in the egg market.

Frank Foxie, second-year engineering student from Trail, B.C., was dining at the egg shop at Assiniboia at the dinner hour when he ate 17 eggs, including 10 poached, 2 soft-boiled and 5 hard-boiled.

Frank was just returning to the business of eating when the eggs ran out.

MERCHANDISING IN ORDERLY WAY ASSISTS FIRMS

If there were no tobacco jobbers' associations, and no price maintenance, or orderly merchandising in the distribution of tobacco products, such firms as Wallace and Norman Company, Limited, Calgary wholesalers in confectionery and tobacco products, would automatically go bankrupt.

This statement was made by Alcey Norman, manager of the company, when questioned on the week of the preliminary hearing of the alleged tobacco combine case.

The Norman and Wallace firm were one of the Southern Alberta Tobacco Jobbers' Association, but resigned when association for a promised donation by one of the members of the company to the Canadian National Institute for the Blind. It was alleged by the association that the donation had been promised in order to secure a greater proportion of the volume of tobacco products distributed by the institute tobacco agents.

Mr. Norman declared that, while his firm had resigned from the association, he was still of the opinion that price maintenance, and orderly merchandising were in the best interests of manufacturers, wholesalers, retailers and consumer.
